

AMENDMENTS TO CLAIMS:

Agent for Applicant respectfully requests the following amendments to the claims without adding any new subject matter. Additions are shown in underlining, while deletions are shown in strikethrough or double square brackets.

1. [Currently Amended] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member having:

(a) moving parts,

(b) controls for the moving parts; ~~and~~

(c) information output circuitry which outputs information regarding the operation of the controls for the moving parts[,]; and

(d) a power pack;

and ~~an one or more~~ energy converters which converts energy to which the member is exposed to electrical energy for powering said information output circuitry to generate information, regarding the operation of the controls for the moving parts,

wherein said one or more energy converters is connected to the power pack whereby electrical energy flows from the one or more energy converters into the power pack and may be stored therein or utilized for powering said information output circuitry to generate information regarding the operation of the controls for the moving part.

2. [Original] A member as claimed in Claim 1 wherein said energy converter comprises a solar panel provided on an exposed surface of said member.

3. [Previously Presented] A member as claimed in Claim 2 wherein said information output circuitry is further linked to a biorhythm sensor.

4. [Currently Amended] A member as claimed in Claim 3 including a digital display also powered by said ~~energy converter~~ power pack and displaying information from said biorhythm sensor.
5. [Previously Presented] A member as claimed in Claim 1 wherein said member comprises a chair and said energy converter converts motion of a moveable portion of the chair to electrical energy.
6. [Currently Amended] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member including an information output device which outputs information concerning the operation of said member, ~~an one or more~~ energy converters which converts energy to which the member is exposed to electrical energy which flows to the power pack and is utilized for powering said information output device, wherein said member comprises a chair and said information output device comprises a control for a moveable part of said chair, said control outputting information regarding directions to the use of said control without producing movement of the chair.
7. [Previously Presented] A member as claimed in Claim 6 wherein said control provides audio feedback providing the directions for use of said control.
8. [Currently Amended] A member as claimed in Claim 6 including a visual display also powered by said ~~energy converter~~ power pack, said visual display visually displaying the directions for use of the control.
9. [Currently Amended] A member as claimed in Claim 1 ~~including~~ wherein the power pack is an electrical rechargeable power pack which is charged by said one or more energy converters, said power pack storing the electrical energy and dispersing the electrical energy as required.
10. [Previously Presented] A member as claimed in Claim 1 wherein said member comprises a chair having rolling casters for generating said electrical energy.
11. [Previously Presented] A member as claimed in Claim 1 wherein said member comprises a chair and said chair has a back and seat and a moveable hinge between said back and seat for generating said electrical energy.

12. [Currently Amended] A member as claimed in Claim 1 further having electrically operated body repositioning means powered by said ~~energy converter power pack, or rechargeable power pack.~~
13. [Previously Presented] A member as claimed in Claim 12 wherein said member comprises a chair and said body repositioning means comprises a lumbar adjustment member, and said chair further includes an electrically generated timer which provides timed interval repositioning of said lumbar adjustment members.
14. [Cancelled]
15. [Cancelled]
16. [Currently Amended] A chair having electrical power requirements including information output circuitry for generating information regarding the use of controls for the electrical power requirements, and a generator carried by said chair for converting energy to which the chair is exposed to electrical energy for powering said electrical power requirements, whereby said generator converts motion of said chair to said electrical energy for meeting said electrical power requirements, wherein said chair includes moveable casters and said generator is disposed in said casters for converting motion of said casters to said electrical energy for powering said information output circuitry to generate information regarding the use of the controls for the electrical power requirements, and wherein said electrical energy flows from the energy generator to a power pack whereby the electrical energy may be dispersed for powering said electrical power requirements of the chair, or may be stored therein.
17. [Cancelled]
18. [Cancelled]
19. [Currently Amended] A chair as claimed in claim 16, ~~further including wherein the power pack is~~ a rechargeable battery carried by said chair, wherein said generator recharges said battery, said battery powering said electrical power requirements of said chair.
20. [Currently Amended] A chair having an electronic display for displaying information concerning controls for moving the chair comprising:

- (a) a ~~rechargeable-battery-power pack~~ carried by said chair for powering said electronic display;
- (b) solar power means carried by said chair for:
 - (i) providing power to said electronic display to display said information concerning the controls for moving the chair; and
 - (ii) recharging said ~~rechargeable-battery-power pack~~;
- (c) chair movement generator means for:
 - (i) providing power to said electronic display to display said information concerning controls for moving the chair; and
 - (ii) recharging said ~~rechargeable-battery-power pack~~;

wherein said ~~rechargeable-battery-power pack~~ provides power to said electronic display for displaying said information.

21. [Currently Amended] A chair comprising:

- (a) an information output device which outputs information concerning controls for moving the chair; ~~and~~
- (b) rolling casters linked to an energy converter for generating electrical energy for powering said information output device; ~~and~~
- (c) a power pack linked to said energy converter for powering said information device.

22. [Currently Amended] A chair comprising:

- (a) an information output device which outputs information concerning the use of the controls;
- (b) an energy converter;
- (c) a power pack; and
- (d) a moveable hinge linked to said energy converter for generating electrical energy in response to movement;

wherein said energy converter converts energy for powering said information output device so as to output information concerning the use of the controls; and

wherein said energy converter is attached to said power pack whereby electrical energy flows from the energy converter to the power pack and is thereby distributed for powering said information output device, or is stored therein.

23. [Previously Presented] A chair as claimed in Claim 22 wherein said chair has a back and a seat and said moveable hinge is located between said back and said seat for generating said electrical energy.

24. [Cancelled]

25. [Currently Amended] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member including moving parts and controls for the moving parts, and information circuitry which outputs information about operation of the controls and an energy converter ~~disposed on operation of the controls for~~ converting energy and transferring said energy to a power pack whereby ~~to which~~ the member is exposed to electrical energy for powering said information circuitry to generate information regarding the operation of the controls for the moving parts.

26. [Currently Amended] A member as claimed in claim 1 wherein said energy ~~connector~~ converter and said power pack power[s] the moving parts and the controls for the moving parts.

27. [New] A member selected from the group of members consisting of a chair member, a bed member and a lounge member, said member including moving parts and controls for the moving parts, a power pack, and a energy converter connected to the power pack and the controls for converting energy to which the member is exposed to electrical energy for powering the controls, or for storage of electrical energy to the power pack.
